

SUDHIR GUNNAM

Penetration Testing Intern | Offensive Security

gunnamsudhir5@gmail.com | +91 8919882181 | Andhra Pradesh, India | github.com/sudhir734 | linkedin.com/in/sudhirgunnam

SUMMARY

B.Tech Information Technology student (2024–2028) specializing in offensive security, with hands-on experience in penetration testing, vulnerability assessment, and bug bounty hunting across live HackerOne programs. Built a real-time intrusion detection system and multiple confirmed security findings on production targets. Seeking a penetration testing internship to apply practical exploitation, recon, and reporting skills in a professional environment.

TECHNICAL SKILLS

Security Testing: Web application penetration testing, vulnerability assessment, CORS/auth misconfiguration analysis, WebSocket security, reconnaissance & OSINT

Tools: Subfinder, httpx, Nuclei, Nmap, Burp Suite, Kali Linux

Programming/Scripting: Python, Node.js, SQL

Concepts: CWE/CVE classification, OWASP Top 10, network security, database security (normalization, transactions, concurrency control)

Environment: Linux (Termux/proot Kali), Git/GitHub, Windows

EXPERIENCE

Cybersecurity Intern — Unified Mentor Private Limited

- Designed and built SentinelShield, a real-time intrusion detection system (IDS) for monitoring and flagging suspicious network activity
- Developed a Python-based Secure File Transfer Monitor to track and validate file transfer integrity and security

Independent Bug Bounty Researcher — HackerOne

- Run a structured reconnaissance pipeline (Subfinder → httpx → Nuclei → manual verification) across startup bug bounty programs including Fly.io, Render, Supabase, Braze, and Modern Treasury
- Identified and reported an exposed Docker registry catalog on Fly.io and an unauthenticated Prometheus metrics endpoint on Bumba
- Discovered a High-severity WebSocket broken authentication vulnerability (CWE-306) on Bumba
- Documented an unauthenticated cache PURGE vulnerability (Braze) and a CORS misconfiguration with credential reflection (Modern Treasury), producing professional PDF vulnerability reports
- Performed responsible disclosure of SQL injection and XSS vulnerabilities to college IT administration at DVR & Dr. HS MIC College of Technology

PROJECTS

- Personal Security Portfolio — Developed a hacker-themed portfolio site featuring a Matrix rain canvas animation and terminal-style UI to showcase security research and writeups

CERTIFICATIONS

Cisco Networking Academy — Ethical Hacker Certification

HackerRank — SQL (Advanced) Certification

Anthropic — Claude Code in Action Certification

EDUCATION

B.Tech, Information Technology — DVR & Dr. HS MIC College of Technology, Andhra Pradesh, India

2024 – 2028 (Expected) | Specialization: Cybersecurity / Offensive Security
